

OnTrack International

Global talent to create local impact.

OnTrack International isn't just for nurse aides—it helps international nurses understand the nursing assistant role and transition to work faster while awaiting Minnesota licensure—and even supports family members of international candidates.

Empowering international nurses, aides, and their families.

Leverage visa wait times for pre-arrival growth

Maximize the lengthy visa process by offering valuable training, ensuring candidates arrive prepared and ahead of the curve.

Build strong, lasting connections

Show your commitment to candidates' success by fostering early connections and a sense of belonging before arrival.

Introduce the Nursing Assistant Role

Provide early insights into the crucial responsibilities of Nursing Assistants, preparing them before stepping into the workplace.

Prepare for MN's unique rules and regulations

Educate on Minnesota-specific regulations and requirements to ensure compliance and smooth transition into their roles.

How it Works

Request access for your OnTrack Program

Organizations with an active MDH-approved OnTrack Nursing Assistant program can sponsor candidates abroad that intend to live and work in Minnesota. Reach out to the OnTrack team at any time to request access.

Enroll learners abroad - anytime, anywhere

Enrollment is simple—your organization can enroll learners anytime, anywhere in the world. It's best to enroll within 6 months of their arrival to MN. Payment can only be completed by the sponsoring organization—learners abroad will never be charged.

While abroad, candidates can complete online, on-demand learning

Remotely, the learner can complete 43 hours of online learning on-demand, at their own pace. Plus, they'll have access to a learning journal with quizzes, activities, and more to enhance their learning.

Upon arrival, they can complete hands-on training and state testing

Once in Minnesota, OnTrack will reactivate the learner's account to complete the required hands-on training. Then they can attempt the state exam to be added to the Nurse Aide registry, "challenge" the exam, or work as an unregistered caregiver.
